

TechCorro™ [BF] Large Foil Bags

Description

Technology Packaging are able to use extensive experience when solving problems for its customers.

A very wide range of aluminium barrier foil laminates allows objective selection of the most appropriate material. Many styles of bags are available including reusable types.

Complementary products such as sealing tools, desiccants, humidity indicators, etc. are available.

Products protected

Bags can be manufactured to virtually any size and can be supplied with many fittings such as hanging loops, windows, glands, zips, etc. This allows them to be used for a very wide range of machinery and equipment.

Complex pieces of equipment that contain metals, electronics, plastics and rubbers require 'inert' packaging and Barrier Foil Laminates are ideal in this area.

Method of providing protection

Barrier Foil Laminates (BFLs) provide protection by virtually stopping the ingress of moisture and/or harmful gasses. Corrosion will not occur if the Relative Humidity is low and the careful use of desiccants inside the bag will keep the RH at a low figure. Technology Packaging calculates the correct amount of desiccant required. If necessary a data sheet is available to download from our web site or to obtain from our sales office, allowing our customers to calculate these figures themselves.

Our design team will also advise if and when other protective materials are required. For example, the use of VCIs, as well as desiccants, within the bag may be advantageous

Supply formats

Bags are manufactured to suit particular applications. New styles and formats are often developed to cater for specific customer requirements.

Corrosion preventive packaging from Technology Packaging

Technology Packaging provide a full range of best-fit products aimed at making sure our customers goods arrive in pristine condition at the lowest cost.

Please see final page for details of our product ranges.

**TechCorro™ [BF]
barrier foil**

Bags
Rolls
Sheets

All these products are supplied with or without VCI

**TechCorro™ [B]
boards**

Corrugated paper
Cartons and boards
Chips

All these products are supplied with or without VCI

**TechCorro™ [D]
desiccant**

Various desiccant types in bags
Bulk
Desiccant with VCI

**TechCorro™ [E]
emitters**

VCI Foams
VCI Devices

**TechCorro™ [EQ]
equipment**

A comprehensive range of items including:- handling equipment, heat sealing tools packing benches, packing cases/containers and more.

**TechCorro™ [F]
films**

Polyethylene films
Stretch films
Shrink films
Laminated film products
Bubble films

All these products are supplied with or without VCI

**TechCorro™ [FL]
fluids**

Oil based
Water based
VOC free and more...

All these products are supplied with or without VCI

**TechCorro™ [P]
papers**

Flat papers
Creped papers
PE Coated papers
Reinforced papers
Laminated paper products

All these products are supplied with or without VCI

**TechCorro™ [PL]
plastics**

Plastic items with or without VCI such as:- netting, corrugated plastic [PlastCorro™], wire and more...

Distributors throughout Europe
