

TechCorro™[P] VCI Paper 'Standard' Range

Description

A range of Kraft papers impregnated with specially formulated chemical compounds that provide corrosion protection for ferrous and non-ferrous metals. TechCorro™[P] papers are saturated with VCI chemical to provide a fast-acting and long-lasting protection. The product weights range from approximately 50gsm to 200gsm for laminated/coated products.

Supply formats

Technology Packaging produces TechCorro™[P] papers in 'Standard' specifications that can be purchased in small quantities as these are usually in stock.

F grade is for Ferrous; M & G grade are for multi-metal protection.

This VCI paper material can be supplied in sheets, wide and narrow rolls, hand-wrapping rolls, bags and die-cut formats. Many other materials can be manufactured to suit particular requirements. Military approved products are available as are customer prints.

Product handling and storage

Ideally the material should be kept cool, dry and protected from direct sunlight. It is preferable to keep it in its original wrapping when possible. If kept in these conditions the material will be effective for a minimum of three years.
