

TechCorro™[D] ProDriPole Container Desiccant

Description

TechCorro™[D] ProDriPole is a desiccant system developed specifically to protect the contents of ISO 20ft and 40ft containers from the detrimental effects of moisture. TechCorro™[D] ProDriPole provides very efficient protection of your goods from the damaging effects of moisture at a cost effective price

Method of providing protection

Using anhydrous calcium chloride as the desiccant, TechCorro™[D] ProDriPole is designed to work in relatively open environments as opposed to silica gel and activated clay which must be contained within a controlled atmosphere such as a hermetically-sealed barrier foil bag in order to be effective.

The design of TechCorro™[D] ProDriPole allows the absorptive qualities of the anhydrous calcium chloride to be maximised.

Generally 4-6 poles are required for 20ft containers and 6-12 poles for 40ft containers. The number varies according to the length of transit, prevailing conditions and type of cargo. Technology Packaging can assist with the development of the correct quantity and system to adopt.

The anhydrous calcium chloride is contained within the top section of the pole and the liquid, generated during the absorption process, is collected in the bottom sump section of the pole.

The TechCorro™[D] ProDriPole is designed and sized to securely hang in the recesses of the container.

Performance

The ultimate TechCorro™[D] ProDriPole absorption capacity is up to 2000g of contained liquid. This demonstrates the immense power of the TechCorro™[D] ProDriPole to protect cargo throughout the entire voyage even under severe conditions.

Specifications

Dims- 750mm x 115mm x 47mm; Gross weight – 1.4kg; Capacity – up to 2000ml

Temp. range: -20°C to 90°C; Material – HDPE

Packaging - Individually sealed in a high-barrier protective sleeve
8 poles per carton; 36 cartons per pallet; Store in a cool dry place

Skilled technicians are constantly reviewing and developing new products that are most often, customer led.

Distributors throughout Europe

TechCorro™ [BF]
barrier foils

Bags
Rolls
Sheets

All these products are supplied with or without VCI

TechCorro™ [B]
boards

Corrugated paper
Cartons and boards
Chips

All these products are supplied with or without VCI

TechCorro™ [D]
desiccants

Various desiccant types
In bags
Bulk

TechCorro™ [E]
emitters

VCI Foams
VCI Devices

TechCorro™ [EQ]
equipment

A comprehensive range of items including:-
handling equipment, heat sealing tools
packing benches, packing cases/containers
and more.

TechCorro™ [F]
films

Polyethylene films
Stretch films
Shrink films
Laminated film products
Bubble films

All these products are supplied with or without VCI

TechCorro™ [FL]
fluids

Oil based
Water based
VOC free and more...

All these products are supplied with or without VCI

TechCorro™ [P]
papers

Flat papers
Creped papers
PE Coated papers
Reinforced papers
Laminated paper products

All these products are supplied with or without VCI

TechCorro™ [PL]
plastics

Plastic items with or without VCI such as:-
netting, corrugated sheets, wire and more...
