

Film wrapping products for the STEEL Industry

Products designed for the automatic wrapping of coils, bars and sheets

Technology Packaging produces, designs and supplies a specialised range of packaging materials designed to mechanically protect and stop corrosion of metal products during transit and storage. Years of experience has allowed the development of an extensive range of high quality corrosion preventive wrappings that match the strict requirements for strength, security and cost-effectiveness

VCI's and their method of providing corrosion protection

VCI's emit small amounts of harmless active corrosion inhibitors. They are attracted to the charged surface of the metal. The flow of electrons in the metal and the flow of ions in the electrolyte surface is unable to operate and corrosion is halted. The length of protection depends on many factors and Technology Packaging staff are available to answer specific questions on corrosion protection or to provide detailed, objective proposals on suitable methods. This is true whether the problem relates to new projects or existing problematic transit and/or storage systems.

Products designed for the Auto-Wrapping of coils and sheets

- **Technical sheet films:** Mono and Co-ex with designed performance to meet modern requirements for cost-effective and 'best-fit' solutions. These can be adhesive coated for certain applications.
- **Hi-strength stretchfilms:** specially constructed materials that create the necessary corrosion protection, mechanical properties and work effectively on a particular machine type. These are manufactured with the typical 'cling' properties of a stretchfilm.
- **Creped woven:** Polypropylene or Polyethylene woven materials which are creped and provide extremely tough structures which conform to coil or sheet profiles.

A very wide range of specifications are available thus allowing our wrapping materials to be made to the most suitable width, thickness or format. They can be supplied in a range of colours and can be printed if required.

Most of these can be supplied without VCI where other adequate protection is used or if the product does not require it, e.g. painted aluminium

Our technical products can be printed with your company name and/or logo to endorse your company's message or adhere to marketing requirements.

Distributors throughout Europe

TechCorro™ [BF]
barrier foils

Bags
Rolls
Sheets

All these products are supplied with or without VCI

TechCorro™ [B]
boards

Corrugated paper
Cartons and boards
Chips

All these products are supplied with or without VCI

TechCorro™ [D]
desiccants

Various desiccant types
In bags
Bulk

TechCorro™ [E]
emitters

VCI Foams
VCI Devices

TechCorro™ [EQ]
equipment

A comprehensive range of items including:-
handling equipment, heat sealing tools
packing benches, packing cases/containers
and more.

TechCorro™ [F]
films

Polyethylene films
Stretch films
Shrink films
Laminated film products
Bubble films

All these products are supplied with or without VCI

TechCorro™ [FL]
fluids

Oil based
Water based
VOC free and more...

All these products are supplied with or without VCI

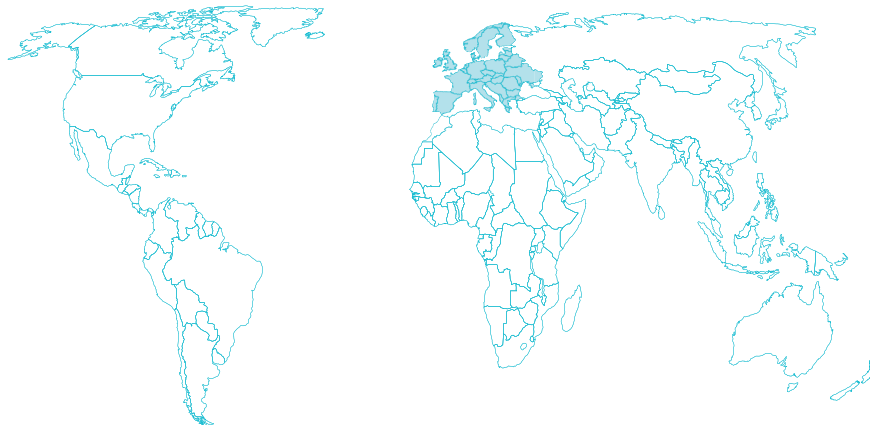

TechCorro™ [P]
papers

Flat papers
Creped papers
PE Coated papers
Reinforced papers
Laminated paper products

All these products are supplied with or without VCI

TechCorro™ [PL]
plastics

Plastic items with or without VCI such as:-
netting, corrugated sheets, wire and more...
